Introduction

Developers forum is a start up idea developed by a bunch of students which is yet to launch.The company specialises in providing top-skilled front-end developers/designers for various clients worldwide.The forum wants to have a website to accomplish it.

Purpose of the document

This document lays out a project plan for the development of Developers Forum.
The intended readers of this document are current and futer developers working on Developers Forum and the sponsors of the project.

Customers

Everyone. Anyone can use this even tho you are an experience developers or fresh.

Functionality

- The users should be able to post the project
- The system should quickly match the clients with the right list of developers/designer
- The developers should be able to choose for one single developer or a team of developer to implement their project.
- developers should be able to like and comment on any post

Platform

It will be launched as a website. And a application for mobile phones later.

Development Responsibility

me and 3 other people will develop the software and i am responsible for the creation of the database and all the other related stuff. and 2 designers.

Goals and Scopes

- They should have a platform where the client can chat, share files and collaborate.
- The client should be able to make payments(PayPal, Visa, MasterCard, bank.
- And the client should be able to rate the different developers
- All 3 players will have a login The information would be stored on a database.
- Aboute us, contact us, feedback and FAQ pages.

Deliverables

I will deliver the following during the course of development:

- Feature specification
- product design
- Test plan
- Development document

Risk Management

Risk Identification

following will be the risk involved in this project.

1) people are already using a similar site/app so what would motivate them to use this instead.
2)

Risk Mitigation

even though most of the users would already use a different platform then this one. we would still offer them things that they wouldn't get on that platform..

1) we would be cheeper.
2) People can post cases where other developers can solve and share what they think.
3) They dont need to register they can log in on their existing accounts of google/facebook ect.

Scheduling and Estimates

Title	Description	date
project aproval		April 28
view and design	front-end	mai 12
database	back-end	mai 20
integrate view and design	back-end/front-end	jun 1
testing		jun 6
fixing issues		jun 7
Final Realise		jun 12

Technical Process

Following would be the languages that i will be using to develop this page.

Front-end: HTML, CSS JS
Back-end: PHP, MySQL

Technical Specification Document

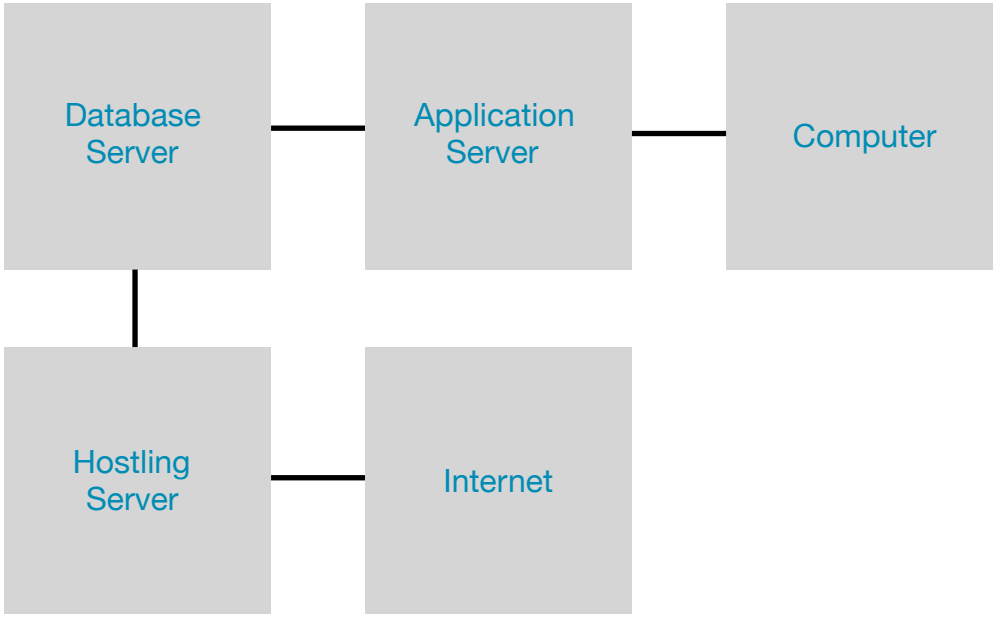
Background

Developers forum is a start up idea developed by a bunch of students which is yet to launch.The company specialises in providing top-skilled front-end developers/designers for various clients worldwide.The forum wants to have a website to accomplish it.

Analysis

Architecture



Design

User Interface/GUI

Nature Of The task	- Design and Development of the User interfaces - Programing of the graphical user interface - Defenition and creating of the graphical layout of web pages -
Education & professional Experience	- d -

Internal Function

- The log in on the page will be that the user can choose between existing log in tru facebook etc or sign up.
- common function will be contact information, clear Navigation, security, social madia integration and a mobile ready version.
- state management will beholden field ASP .NET witch also me to store information in a hiddenField which renders as a standard HTML.
- i will useVPS(Virtual Private Server).
- for runtime environment i will use RTE.

Database

- MS SQL, ORACLE, MySQL

- i would use database to store information

Project Plan

Level 2 Developers Forum

Jeanette Leine - April 24, 2018

Product Backlog

Story	Priority	
Client/I want to be able to post project	High	1
Client/I want to be able to select a single developer/ designer for my project.	High	3
Client/I want to be able to select a team for my project	High	3
Client/I want to be able to browse the developers: Profile, their work, years of experiens, rate	High	2
Client/I want to be able to make a developer/designer as a favorite	High	5
Client/I want to be able to chat,share and collaborate with the developers/designers	High	4
Developer/I should be able to show my profile	High	2
Developer/ I should be able to show my hourly rate	Low	6
Developer/ I should be able to chat,share files and collaborate with my team members and client.	High	1
Admin/ I should be able to match clients with the developer/designer list.	High	5
Admin/ I should be able to create communication platform like chat,share and collaborations	High	4
Admin/ I should be able to let the developer/designer upload their profile and information	High	2
Admin/ I should let the client be able to select teams or individual members	High	3

Admin/ I should let the client be able to create favorites	High	2
Admin/ I should make a payment arrangement	High	2
Admin/ I should be able to make a rating system on the developers/designers.	High	5
Admin/ I will make a login platform for all users in separate versions	High	2
Admin/ I will make a database for the login information.	High	2
Client/ I want to be able to rate the designer/developers	Low	7
Client/I want to be able to hand over the project to favorites in the list	Low	5
Client/I want to be able to filter the results in hourly rates and years of experience	Low	7
Developer /I want to receive client projects	Low	

Sprint Backlog

Volum 1 Sprint Goal	User Stories of High Pro	Deadlines	To Do	Doing	Start	Done
Profile						
Paymethod/ chargemethod					11.04	13.04
Everything that is High Etc					16.04	
Volum 2 Sprint Goal	**User Stories of Low Pro**	**Deadlines**	**To Do**	**Doing**	**Start**	**Done**
Rate Designers					09.04	12.04
my hourly rate						
Everything that is Low Etc					09.04
